DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 and 8-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 8 recite the limitation "a fastener member" in line 2. Following this phrase, on lines 8 and 9 of claims 1 and 8 respectively, the phrase "the plurality of fastener members" is recited. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by European Patent Application 0657118.

Application 0657118, in Figure 5, discloses a fastener member including a strip shaped base 1 and engaging elements 2 provided on a major surface of the base. Moreover, a protrusion is also illustrated projecting from the major surface in a

substantially similar orientation 2. Lastly, there is an extension extending from a back surface opposite to the major surface in a hooked 4 and bent manner 3.

Allowable Subject Matter

Claims 1 and 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 2-5, 7, and 9-21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art did not ostensibly teach nor fairly suggest, in whole nor in part, an work holding apparatus with the combination of affirmatively recited claim limitations.

Specifically, a strip insertion tool for installing a fastener member including a strip-shaped base and engaging elements having a plurality of attaching sections capable of being individually engaged with a plurality of fastener members as illustrated in Figure 7. The analogous prior art only discloses tools capable of inserting a single fastener member at a time.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Londono, Stone, and Armellini disclose strip insertion tools. Eberle, Aritake, and Smith disclose fastener members.
